About Me

I'm a **servant leader**. I genuinely love representing others, learning their products and practices, and making the whole team as successful as possible.

As a certified PMP, CSM, and PMI-ACP, I've helped teams see the value in **Agile** and **Scrum**, adapt at a sustainable pace, and reap the benefits of small commitments, constant planning and refinement. I've prioritized shared backlogs of many products and have coded everything from the smallest script to a department-powering web application. And I have an affinity for clean and consistent UI and attention to detail in finishing and shipping products.

Experience

Independent Project Manager • Various Clients

FEBRUARY 2025 - PRESENT

I prioritized giving back to various organizations and causes important to me throughout the first sabbatical of my professional career.

- Directed teams as full-time Theming Director for CA non-profit (NDA)
- Developed and managed web apps and content for CA non-profit (NDA)
- Volunteered and performed for three tentpole Games Done Quick multi-million dollar charity events
- Acted as Lead Playtester for the indie hit video game *Blue Prince* (2025)
- Produced interview content with the developers of indie hits *TUNIC* (2022) and *Blue Prince* (2025)

Project Manager • UCF IT Project Management Office

OCTOBER 2022 - FEBRUARY 2025

I was a PM for the central IT PMO, handling projects from demand through to closing. Projects ranged in size from a few to dozens of stakeholders.

- Met with stakeholders regularly to determine and refine objectives, requirements, scope, risks and deliverables
- Managed communications to keep all stakeholders informed
- Coordinated various IT and vendor teams to stay in sync
- Regularly led kick-offs, presentations and retrospectives
- Worked with vendors to maintain good momentum and relationships
- Contributed to policies, templates and other standards

Product Owner • UCF IT Digital Solutions

AUGUST 2017 - OCTOBER 2022

I was the Product Owner for a small Agile team of 3-4 devs with a large portfolio, in addition to playing the role of Scrum Master for multiple teams.

- Oversaw portfolio of 40+ custom software products and apps
- Developed product visions and a rationality index for all apps
- Successfully managed the on-boarding and standardization of 5+ colleges' applications and technical debt
- Drove Agile adoption through practices, rituals, and consistency
- Improved team cohesion through quarterly retreats

- Developed a standardized application retirement process
- Led workshops on Scrum topics, including affinity estimation, Definition of Done development and retrospectives
- Proactively championed UI/UX standards for all applications
- Utilized Azure DevOps for boards, burndowns, and build/release pipelines

Web Applications Programmer Manager • SDES IT

MARCH 2013 - AUGUST 2017

I was promoted to the role of manager in our growing application development department. I also continued to develop web apps and assist with design tasks.

- Managed a diverse team of 6 designers and programmers and coordinated all projects, tasks, and deliverables
- Developed 30+ web apps for internal and external use, primarily in C# MVC
- Worked with the Project Management team to develop procedures, workflows, and a ranking rubric for incoming project requests
- Prepared / delivered presentations to clients, teams, and VPs
- Proactively developed team standards, policies, and procedures
- Primarily worked in Visual Studio, Git, IIS, SQL, and SharePoint

Web Applications Programmer • SDES IT

DECEMBER 2008 - MARCH 2013

I created and maintained custom web applications in PHP and .NET (C#) for a large division. I transformed the unit from having low/no standards and spaghetti strategy to having a single, shared UI and common content and coding standards.

- Managed collection of 100+ sites for various departments in IIS
- Coordinated division webmasters by creating shared standards
- Developed responsive division-wide web and SharePoint templates
- Frequently met clients to turn concepts into business solutions
- Primarily worked in Visual Studio, IIS, SQL, and Adobe Creative Suite
